EXPERIENCE

Jackrabbit Mobile, Austin, TX — Web Applications Developer

Current Job

As a Web Applications Developer, I help build full-stack web applications using Angularjs, Ruby on Rails and tested those applications with Karma and Jasmine.

Ninbitsu, Austin, TX — Web Developer

April 2016 - May 2016

As a Contract Web Developer, I worked with a UX Designer to deliver a fast, user centric, full-stack solution for the client. I used technologies such as React.js, Sass, Bootstrap and Ruby on Rails..

Conversion Fanatics, Austin, TX — Front - End Developer

February 2016 - March 2016

As a Contract Web Developer, I updated sign up forms to use modern technologies such as jQuery plugins, HTML form field types for touch screen, Bootstrap implementations while creating split-tests in the Optimizely platform.

Blue Goji, Austin, TX — HTML Email Developer

February 2015 - June 2015

As a HTML Email Developer I created dynamic and responsive email layouts while ensuring email messaging was accessible and optimized for delivery across all email clients on both web and mobile.

Frost Bank, Austin, TX — Employee Benefit Broker

May 2013 - October 2014

As an Employee Benefits Broker, I helped companies navigate the complexities of group insurance and health care reform to deliver quality risk management and insurance programs for their employees.

SKILLS

HTML/CSS, Sass, JavaScript, jQuery, Bootstrap, Angular, AJAX, React, Ruby, Rails, Node, Postgres, MongoDB, Express, Git, Github, Karma, Jasmine, Heroku, AWS

Critical thinking

Clear communication

Coachable

ABOUT ME

Over the past two years I have been transitioning from Insurance Advisement to Web Development. I have done this by taking on contract work from Ninbitsu, Conversion Fanatics, Blue Goji, and currently Jackrabbit Mobile; along with taking an intensive 12 week web development course through General Assembly.

EDUCATION

Baylor University, Waco, TX

June 2005 - December 2008

While at Baylor I studied business and competed in a entrepreneurship competition which the team I was part of finished 2nd out of 85.

General Assembly, Austin, TX

August 2015 - November 2015

The education I received from General Assembly ranged from programming fundamentals to launching full-stack web apps, and learning to solve problems with code while applying industry best practices in a collaborative environment.
